**COMMENTS**

**Mr. A.H.S.P. Mendis - CCCT/06/06/026**

I was happy to hear about this scholarship program as young people like us get opportunities to follow IT courses without paying money. As our family members are not in a position to pay for my studies, this RIITS course helped me to gather modern IT knowledge and skills which helped me to find a good job. Truly, this course helped me to uplift my mentality. Although we got different aids and help to build up our lives, we didn't get any opportunities to be involved in any educational programs. RIITS program was the only program that I have come across to build up my life in educational perspective. Therefore, I participated in this program with a great encouragement and enthusiasm. Therefore I worked hard and got through the course with a **merit pass and I got a computer as a gift from IFS**

**Mr. W.S. Kumarasinghe - ACCT/06/03/036**

This course is very good and I have no hesitation to say that RIITS course is far better than other computer courses conducted by many private institutions by getting large sum of money. I have an idea of following a computer course when I was studying in Grade 4. But, I couldn't attend a course due to lack of money. Truly, this course helped me to uplift my mentality. Although we got different aids and help to build up our lives after Tsunami, we didn't get any opportunities to

be involved in any educational programs. RIITS program was the only program that I have come across to build up my life in educational perspective. Actually, I participated in this program with more encouragement and enthusiasm. I worked hard and got through the course with a **merit pass and I got a computer as a gift from IFS**. My knowledge was opened to a vast knowledge base relating to the field of Information Technology and also I learned how to work on time during the course
