

SustAInify '24 - Call for international participants!

Subject - SustAInify: International Data Science x Sustainability Competition by Sustainability Cell, Indian Institute of Technology - Bombay

Mail:

Greetings from the Sustainability Cell, Indian Institute of Technology - Bombay!

We are a student-led body that works to foster sustainability at IIT Bombay (India) through technical, policy, and behavioural changes. We are one of India's leading student Sustainability bodies and a 38 member strong team. Our mission is to serve as the hub for all the institute's sustainable development innovations, research, and teachings.

This weekend, we are launching **SustAInify**, a **Global Sustainability and Data Science Competition** in collaboration with **SustEarn** (a growing Sustainability startup), and we believe it would be a valuable experience for the students of your University.

The Sustainability Domain is booming across industries, with roles emerging in Data Analytics, Green Financing, ESG Consulting and more, allowing students to contribute to solving global challenges like climate change and shaping a better future, along with a wonderful career for themselves. SustAInify is the perfect opportunity to get started!

The competition is open to all students across the globe, is a 2-day long hackathon, has only one submission round and has an amazing **Cash Prize Pool of INR 30,000 is up for grabs!**

- First position: INR 15,000
- Second position: INR 10,000
- Third position: INR 5000

It focuses on optimizing the electricity procurement strategy for a steel manufacturing plant sourcing power from the various sources. The challenge is to minimize the product of costs and carbon footprint while ensuring a minimum threshold of renewable energy utilization.

We believe with your University's student participation, we can enhance the competition's impact. We would request you to share the competition details (attached below as well) with your community members through email, social media, or internal communication channels.

Timeline for the Competition :-

- Registration Begins: 12:01 AM (IST), 7th February
- Problem Statement Release: 12:01 AM (IST), Saturday, 10th February 2024
- Submission Deadline: 11:59 PM (IST), Sunday, 11th February 2024

Registration Details:

Ready to compete? Register now through the link:
